

Free Software for Kids!

Tux Paint

An artistic program for young children,
developed by volunteers around the globe
and designed for kids of all ages

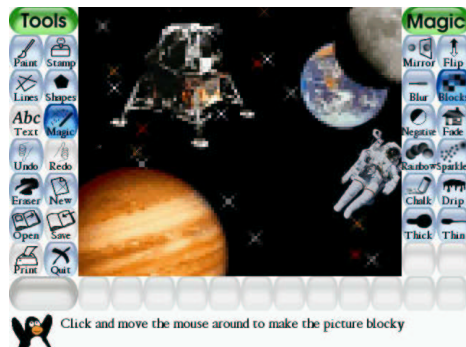

Completely free, Open Source software!
Multilingual!
Runs on Windows, Mac OS X and more!

*We think Tux Paint is great...
But don't take our word for it!*

**Virtual crayons
for your computer
(with none of the mess!)**

**Stickers & stamps,
as well**

"Tux Paint will keep your kids (and you)
entertained for hours on end."
-Linux Magazine, November 2002

"It is a superb tool for the little ones: children are
immediately at ease and able to produce superb
creations." -Logiciels Libres pour l'Education
(Free software for Education),
December 2002

"Do you have small children? Have you made the
move to OS X? Do you and/or your kids miss
Kid Pix? Then I strongly recommend that you try
Tux Paint." -MacMerc, July 2003

"Teachers and students have switched from
Kid Pix Deluxe to the open-source program
Tux Paint. Teachers were blown away by the
program's features, easy of use, and kid friendly
layout." -Chris Gotstein,
Stormonth Elementary School, Wisconsin

"The kids love it! (and so do I)" -David Trask
Vassalboro Community School, Maine

"Kudos and thank you for your tremendous
contribution to the world. Tux Paint is a joy to use,
a wonderful idea, and done quite well. You have
done a great thing by making this program!" -
Sean Dembrosky,
ArtWorks Visual Art School & Gallery,
Trenton, New Jersey

Kid Pix is a trademark of Broderbund Software Incorporated.

Fun!

Easy!

Free!

Designed with kids in mind, Tux Paint takes only minutes to learn... and they can't mess up *your* files in the process.

If your child is able to use a mouse – or wants to learn how – Tux Paint is for them!

Tux the cartoon penguin helps guide and encourage your child while they draw, throwing in educational facts wherever possible. Before you know it, your child will be telling *you* which is the 6th planet in the Solar System!

Best of all, Tux Paint's price can't be beat! It costs nothing! Volunteer developers have created it (and continue to improve it) for the good of all kid-kind.

Tux Paint is released as 'Open Source' software, following the same philosophy that helped make the Internet itself possible. A philosophy that is now embraced by governments and corporations around the world – like IBM, Apple, Sharp, Oracle, DreamWorks and HP. *(For more information on Open Source, visit www.OpenSource.org)*

What this means to *you* is that Tux Paint is **free of cost!** Plus, you can **copy** it and **give it away** to friends, family, and schools!

Features

Easy to use:

- Point-and-click controls
- One-click Save (no “C:\WINDOWS\” to learn)
- Open pictures using thumbnails
- Complicated options – and even lowercase letters – can be disabled for less advanced users
- Full-screen mode to keep kids from accidentally deleting or damaging other files

Kid-oriented:

- Bright colors
- Wacky sound effects
- Friendly cartoon mascot

Basic drawing tools, including:

- Paintbrush – many brush shapes and colors
- Eraser – hilarious 'squeaky' eraser
- Lines – draw lines with any brush
- Shapes – stretch and rotate; filled or outlined
- Text – with many fonts
- Undo / Redo – multiple levels

Rubber Stamps, including many shapes:

- Animals
- Plants and flowers
- Food
- Money
- Outer space
- Symbols (Math, Music and more)
- *and add your own!*

Special Effects, including:

- Rainbow
- Sparkles
- Flip and Mirror
- Blocky
- Blurry
- Chalk
- Drippy

Supported Platforms

If you have a computer, chances are you can run Tux Paint on it!

PCs running **Microsoft Windows**; including Windows95, Windows98, Windows NT, Windows ME, Windows 2000, and Windows XP 

 Apple Macintoshes running **MacOS X** (Classic Mac support coming soon!)

Intel PCs running **BeOS** 

 Any systems running **Linux, BSD** and even **Sun Solaris**
